

FEATURES

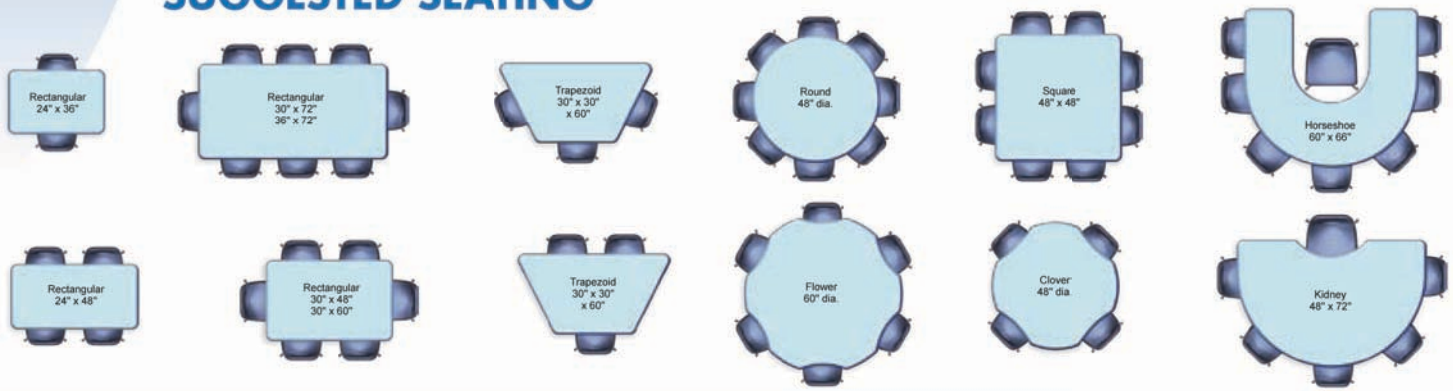

- Laminate table tops are 1.125" thick, are laminated on both sides for a stain resistant and easy to clean surface, and have rounded corners for safety.
- The table substructure is made from medium-density particleboard (47 lb/ft³) that is at least 90% recycled (minimum 4% post-consumer, balance pre-consumer). It is EPP certified, CARB compliant and may contribute to LEED points.
- Color banding is made from PET and contains no phthalates. It grips into the table edge and is pinned in place with recessed nails to ensure that it cannot be removed.
- Tables are available with Toddler size legs (15"-23" high) or Standard size legs (19"-30" high) and adjust in 1" increments.
- Table legs have a powder-coated finish on the upper and chrome-plated finish on the adjustable insert.
- Easy mount leg installation with pre-installed brackets and predrilled screw holes.
- Color coordinated polypropylene ball glides are standard. Traditional nickel-plated self-leveling glides are available for an additional charge.
- 18 gauge galvanized steel stability bars, with poly caps, installed on underside of 72" tables.
- Superior shipping materials meet or exceed ISTA regulations.

Edgebanding available in 5 colors.*

*WOOD GRAIN ONLY AVAILABLE IN BLACK.
